

Connect 004

One of the world's most strategic modern games with a Bond twist

- Photoelectric sensors
- Lasers
- Neopixels
- And a Bond watch that lets you shoot at targets

Addicted yet?

Use the laser watch to shoot at the photoelectric sensor at the top of the column in which you want you drop your coin. The next player uses his watch to do the same until one player gets four coins of the same colour together either horizontally, vertically or diagonally to **WIN**

CONCEPT: **Connect Four** is a game of counter-strategy. While the rules of the game may be simple, it is an extremely challenging, stimulating and addictive game to play. The game holds the interest of kids and adults alike. We built on the classic game by adding an element of stealthiness and target practise to allow for a wearable version of the game. Therefore, having a watch that lets you shoot lasers to determine the placement of your coin made it seem more like the work of a secret agent. Thus **Connect 004** was born.

The target audience is anyone who loves spy movies and/or strategy games, of course!

And who doesn't?
